Sender Email

This is required to enter the sender email address.

Subject

This is required to enter. In the subject line also you can put dynamic values like in Message (Email body).

CC

This field is optional.

BCC

This field is optional.

Attachment

Send documents as email attachments.

Html Content

If you want to send email with plain text then this checkbox should be unchecked.

If you want to send email with html content then checkbox should be checked.

Message (Email Body)

Replace dynamic field values (including email address).

In Email contact there are some more options to replace dynamic value. Below the key you can use and it is a map with Email Recipients list.

[Email]

[FirstName]

[LastName]

[Option1]

[Option2]

[Option3]

[Option4]

[Option5]

Email Recipients

In this list you can add, update or delete Recipients.

If you want to delete any email then select row and press "Delete" key from the keyboard.

If you want to edit any columns value then click on that column and press F2.

Send

Sends the specified message to the recipients in the To, Cc, and Bcc.

Stop

Stop sending emails.
